

RAVEN®

CRUIZER™

Precision guidance that gets right to the point!

Simple in every way. Simple to install. Simple to operate. Simple to understand. And since Cruiser is surprisingly affordable, you enjoy quick payback through improved efficiency and input savings. Easy installation and operation gets you in and out of the field in a hurry.

Less stress and fatigue. Cruiser's easy to read guidance display means you have one less thing to worry about while you're working. That allow you to concentrate on other important activities and information. You can make life less stressful with an upgrade to Raven assisted steering.

FEATURES & BENEFITS

- Large 5.7" color high-resolution touch screen display
- Integrated light bar system
- Easy two-step installation
- Built in 10 Hz DGPS receiver
- Choice of patterns: Easily switches between A-to-B, Last Pass and Pivot
- Bird's eye view and downfield 3-D perspectives.
- Ready to upgrade with Raven assisted steering (Smartrax) or Raven tilt sensor

SmartBoom

SmartBoom is the simple and affordable way to add automatic section control to your application system for greater efficiency and chemical savings. With SmartBoom's automatic GPS-guided on-off section control, you can cash in on faster, more accurate spraying while eliminating costly skips and overlaps—and avoiding no-spray areas. No field computer required. All you need is GPS.

SmartRow

SmartRow is a quick, affordable way to add automatic planter section control to your operation for faster, more accurate planting. And with SmartRow's optimum GPS-guided on-off section controls, you can also cash in on easier harvesting and higher yields by avoiding costly skips and cross planting. No field computer required—all you need is GPS.
