

RAVEN®

VIPER PRO

### NEW TO THE VIPER PRO

- Windows XP embedded operating system
- Increased memory, faster processor
- LastPass 3-D guidance
- SmarTrax/QuickTrax steering option
- Wireless communication option
- On-vehicle weather station option
- GreenSeeker variable rate control interface

### DRIVING ADVANCES FOR GREATER PRODUCTIVITY

Powered by the Windows XP operating system, ViperPro quickly turns industry-leading technology into simple, easy-to-use programs that make your job easier and more productive than ever. Important advances like the industry's first in-cab wireless communications capability, GreenSeeker variable rate nitrogen control interface, real-time weather records and universal program/equipment compatibility.

### ENHANCED RECORD KEEPING AND MAPPING

Viper Pro gives you more ways to manage your field records for maximum efficiency and productivity. Variable rate map technology, easy-to-read field coverage maps, a variety of in-cab review options and real-time weather recording help you get more out of your fields while eliminating skips and unwanted overlaps with ease.

Viper Pro's wireless in-cab communications technology also lets you access, load and transfer files and information when you're in the field - or you can use a simple thumb drive with one of Viper Pro's three USB ports. With multiple file formats to work with, Viper Pro's extra program capabilities help you to understand more, do more - and make more.

The ViperPro is the first-ever guidance system to have wireless capability, giving users menu options for integrating real-time, in-field conditions to a desktop or laptop computer wirelessly. One example of this is a weather station mounted on the machine, sending real-time weather information, such as temperature and wind speed, via a wireless modem to a computer in the office. The possibilities are endless.

### VIPER PRO

Part#	Description	Price
117-0171-112	Viper Pro Kit with Guidance	<b>\$8,805.00</b>

### ANTENNA

117-0171-071	Phoenix 200 Antenna	<b>\$2,670.02</b>
117-0171-091	Phoenix 300 Antenna	<b>\$9,962.55</b>

### OPTIONAL VIPER PRO ACCESSORIES

#### AccuBoom™

AccuBoom automatic section control is your best protection against rising input costs—and pays for itself in no time. Greater fuel and chemical savings, faster spraying times, ease-of-operation and more accurate spraying all add up quickly to improve your return on investment each and every season.

**SmartSteer™** assisted steering takes the stress out of driving and helps you improve your operating efficiency and performance at the same time. This affordable, simple-to-install assisted steering system is intelligently designed to keep you on line all day long with convenient hands-free driving.

**SmarTrax™** assisted steering is the next step you can take to improve your precision farming capability. With operating speeds up to 27 mph and faster line acquisition, SmarTrax hydraulically controlled steering lets you cover more ground in less time with faster, more efficient applications. Across-the-board compatibility with Raven guidance systems and field computers, tilt compensation, automatic system calibration and unique yaw sensor design make your life that much easier. Hands-free.
