Standard Base Trailer

**Safe to pull in the field or on the highway**

- Torsion axles for improved ride and longevity
- Electric Brakes on both axles for optimum stopping power
- Fuel tank baffles help prevent the fluid movement in the tank from affecting the truck towing it, by minimizing sloshing and fluid push. The ADT500 and ADT750 each have two baffles, while the ADT990 supports three baffles.
- 3500 lb 10 ply highway tires, not implement tires

**Built rugged to stand up to the demands of today's farmer - Built strong for years of use**

- 10 gage steel
- Double welded fuel tank seams
- Reinforced inner tank structure
- 6" C channel trailer frame

**Quality and Convenience to keep you running**

- Reinforced fenders and a hand rail allow for a secure position to fuel equipment high off of the ground
- Two fuel level sight glasses to quickly monitor fuel resources
- Fuel filter with a filter service gauge lets you know when to replace the fuel filter
- Comes standard with a GPI 25gpm commercial grade fuel pump
- With a 6" sump, all fuel is drawn out below the main level in the tank, helping you use all of the fuel in the tank.
