Features:
- Dual outlet design produces two 110° flat fan spray patterns using the patented technology from the Turbo TeeJet nozzle.
- The angle between each spray pattern is 60° forward to back.
- Best suited for broadcast spraying where superior leaf coverage and canopy penetration is important.
- Droplet size range is slightly larger than for the Turbo TeeJet nozzle providing drift-reducing properties with increased canopy coverage and penetration.
- Molded polymer for excellent chemical and wear resistance.
- Available in various VisiFlo® color-coded capacities with pressure ranges from 20-90 PSI (1.5-6 bar).
- Ideal for use with automatic sprayer controllers.
- Automatic alignment when using with 11441A-CELR Quick TeeJet cap and gasket.

**New!**

**New!**
**Air Induction Turbo TwinJet**

**Features:**
- Air induction with dual 110° flat fan patterns
- 60° between leading and trailing spray patterns
- Good coverage with increased canopy penetration and best drift control
- Best suited for postemergence applications
- Excellent drift control with coarse to very coarse droplets
- Available in eight VisiFlo® color coded capacities color represents total flow
- Pressure ranges from 20-90 PSI (1.5-6 bar)
- Automatic spray alignment with use of TEEJET Quick TeeJet cap and gasket for sizes 02-06; 114502A-*CEL for sizes 08-15

---

### Typical Applications:
- **Good coverage with increased canopy**
- **015_CAT51A_AITTJ.indd   15**
